## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a method of screening compounds.

Group II, claim(s) 12-30, drawn to a method of inhibiting an immune cell activity by targeting immune cells with NTPDase inhibitors.

Group III, claim(s) 31-39, drawn to a method of preventing transplant rejection by administering an NTPDase inhibitor.

Group IV, claim(s) 40-41, drawn to a composition.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method of Group I was well-known in the art at the time the claimed invention was made (see, for example, Gendron et al Journal of Medicinal Chemistry 2000). Therefore, the method of Group I, i.e., a method of screening for a compound wherein the candidate compound is contacted with NTPDase, and wherein the candidate compound is selected if the activity of NTPDase is reduced (i.e., the compound inhibits NTPDase) in the presence of the compound, cannot be considered a special technical feature. Therefore, the inventions of groups I-IV lack the same general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1657

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
